# How?

1. Look at **existing designs**

2. Come up with an **idea**

3. Make a **new design**

**Share** it with friends

4. **Print** it

**Distribute** it

# 1. Existing designs

- **Stickerboxes** at hackerspaces/events (e.g. CCC, FOSDEM, ...)

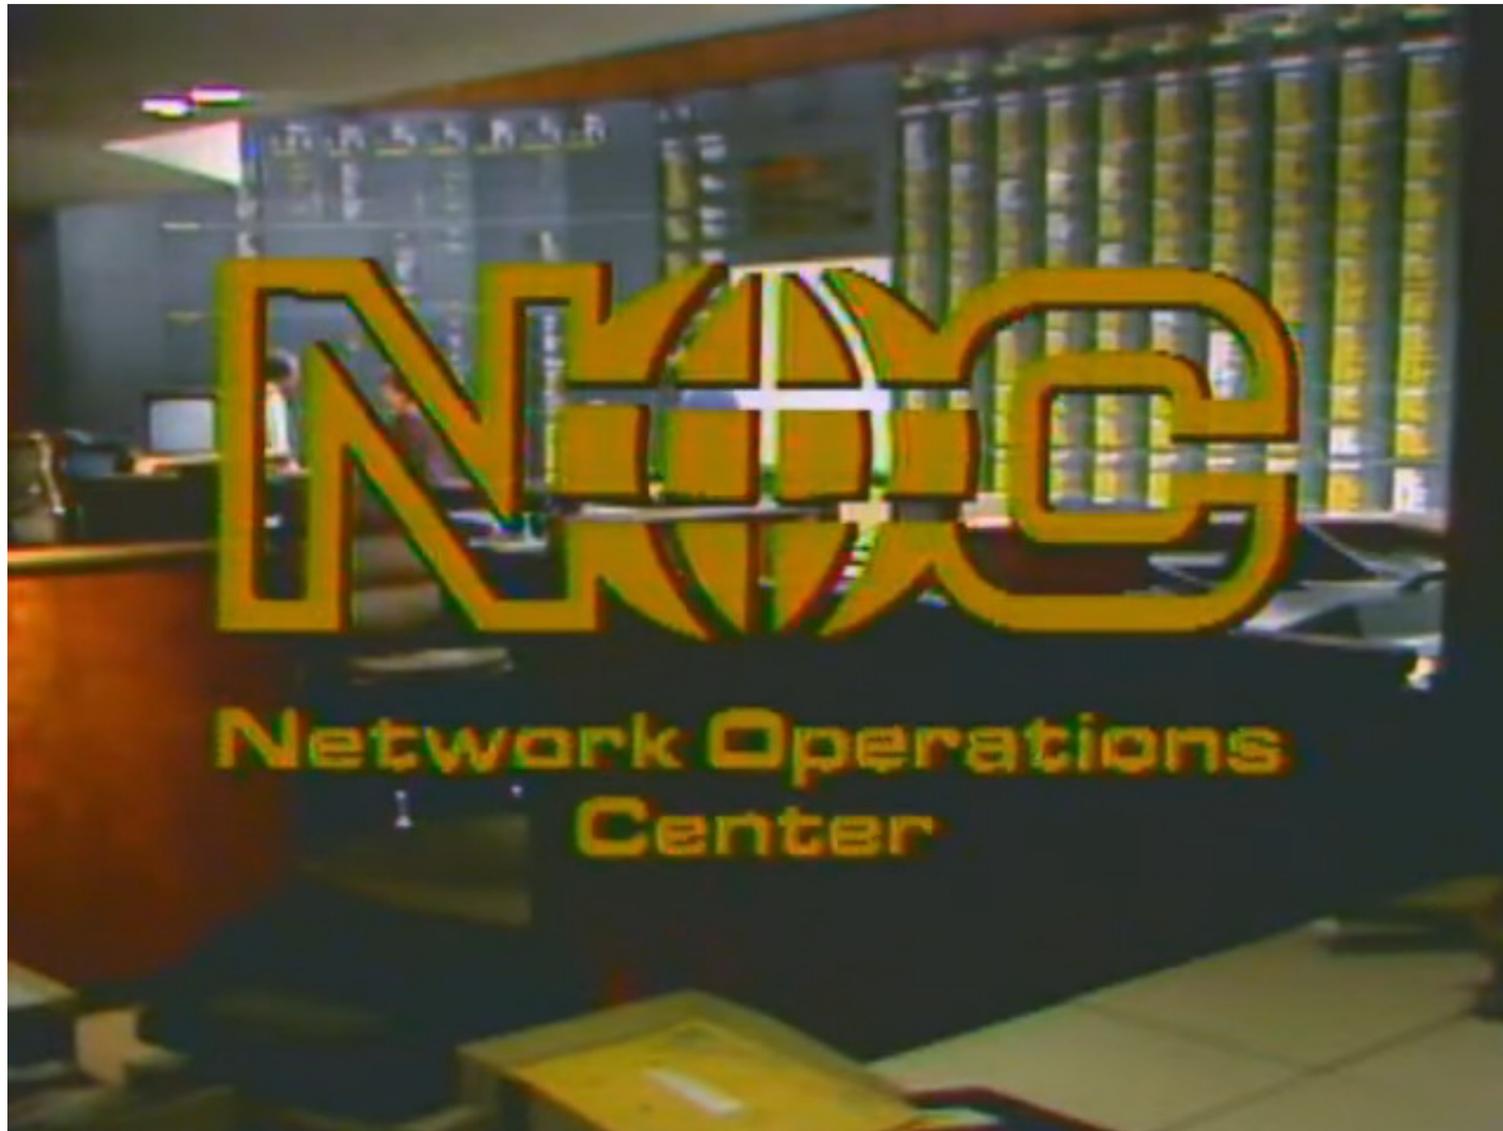

# 1. Existing designs

- IRL designs

# 1. Existing designs

- Online designs

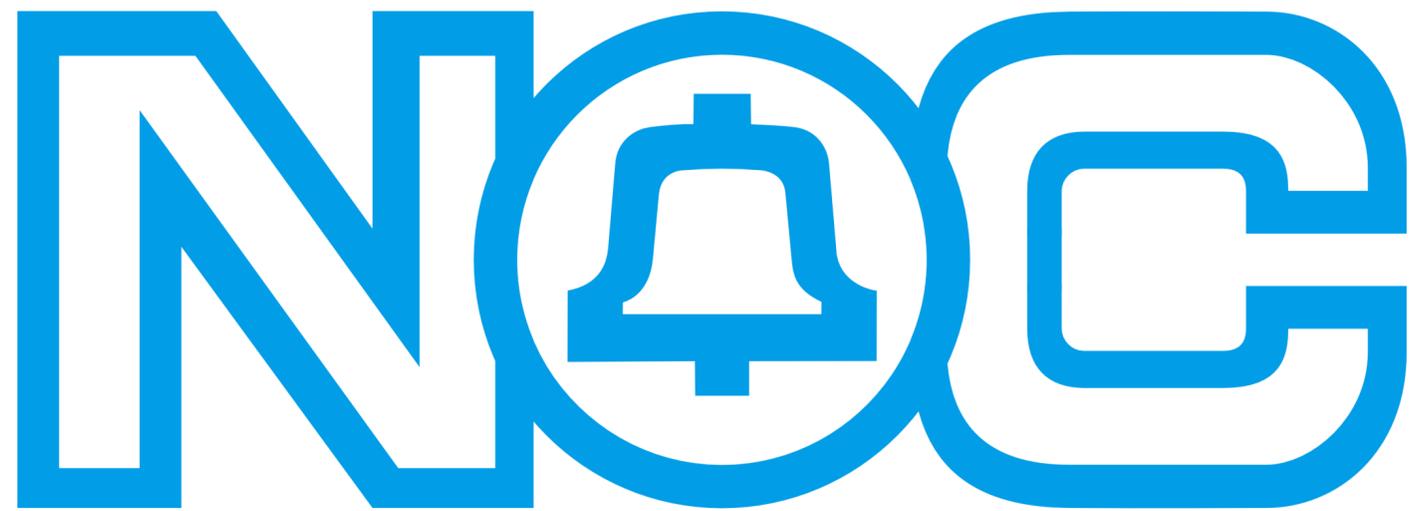

## 2. Come up with an idea

- Reproductions (vector) / Light Variations

# 2. Come up with an idea

- Imaginary designs / Jokes

**Network Operations Center**

“Emergency solution since”

“Inspected Trust me, bro”

# 3. Make a new design

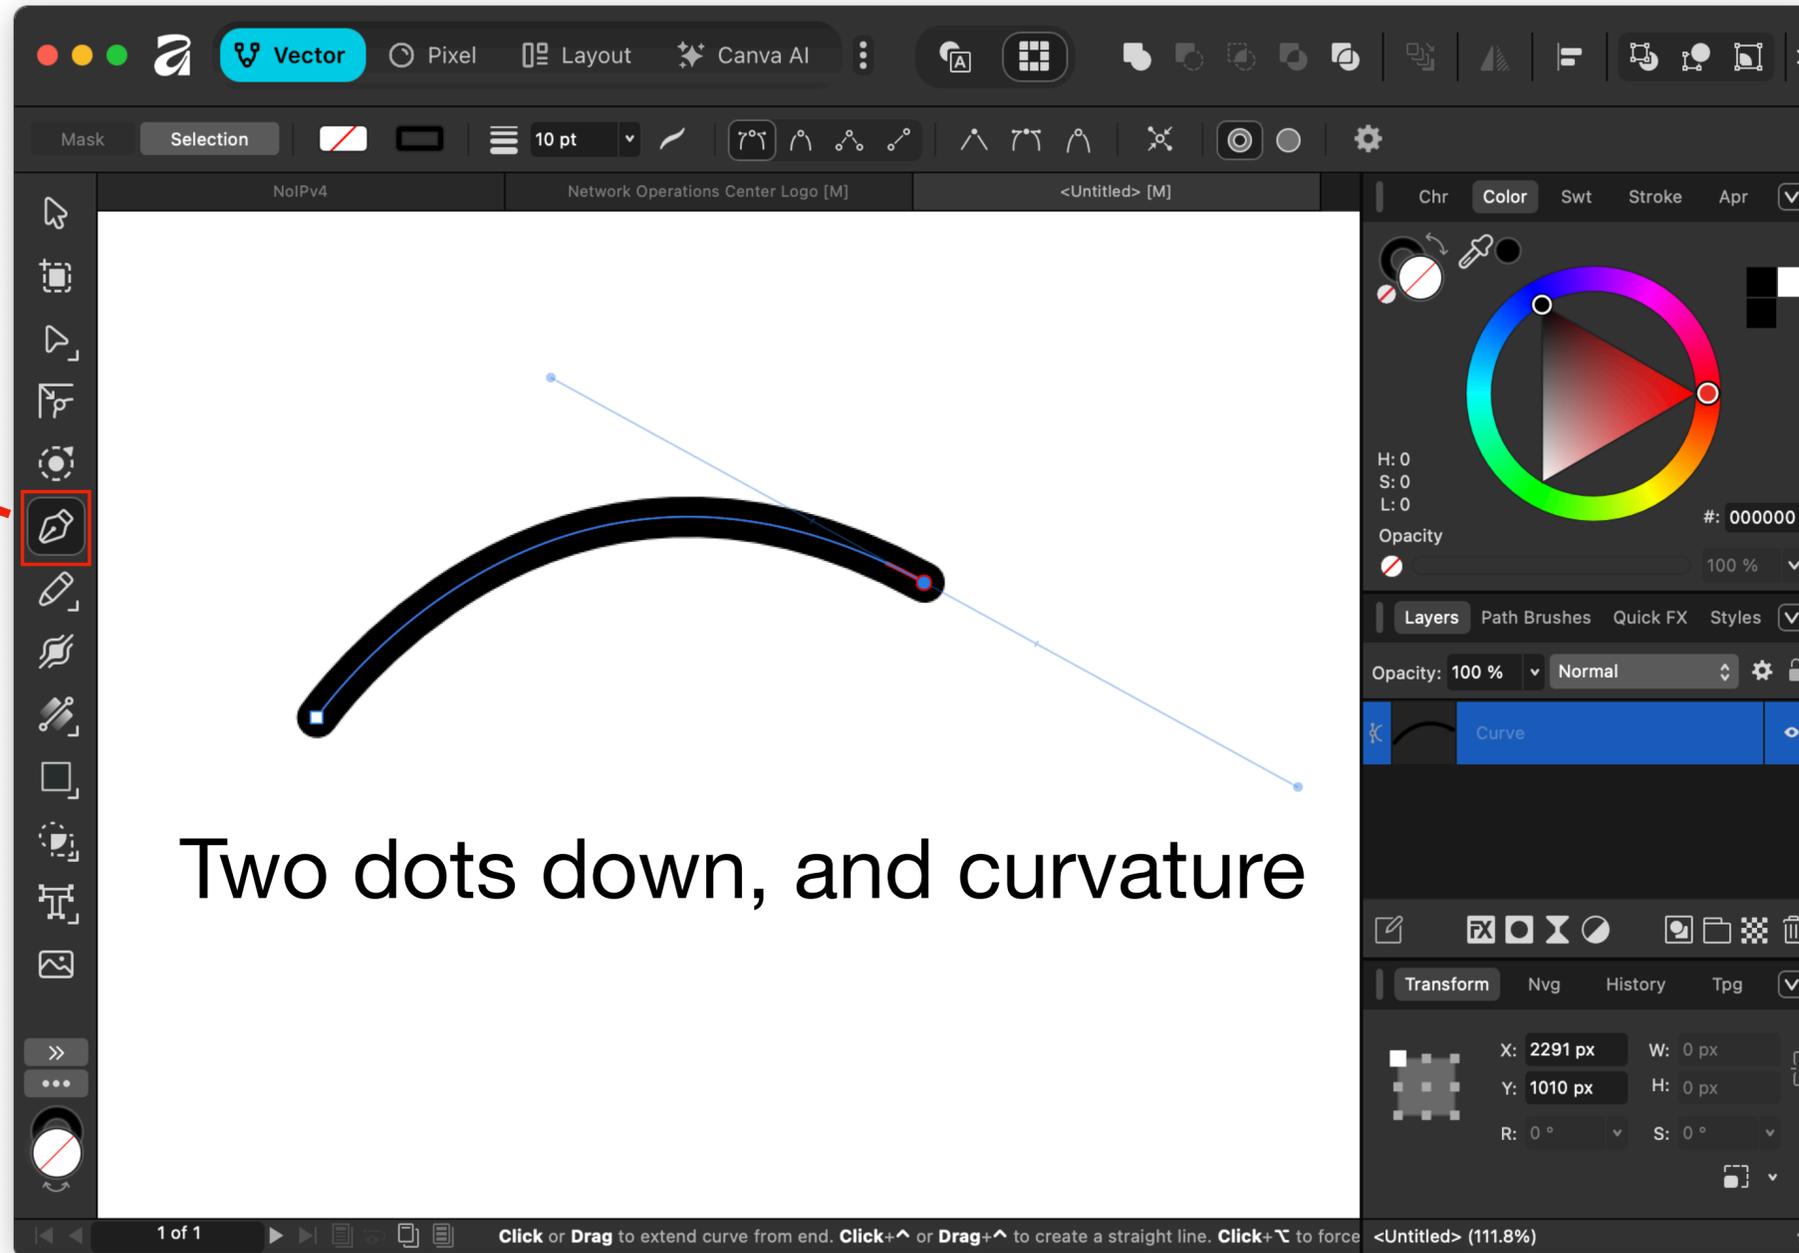

- **Affinity** was recently bought out by Canva, made **free**
  - “Adobe competitor”
- **Vector** graphics
  - No pixels, **shapes**
  - scales **infinitely**
- fonts = shapes

# 3. Make a new design

Pen Tool

- Rectangle Tool
- Ellipse Tool
- Rounded Rectangle Tool
- Triangle Tool
- Diamond Tool
- Trapezoid Tool
- Polygon Tool
- Star Tool
- Double Star Tool
- Square Star Tool
- Arrow Tool
- Donut Tool
- Pie Tool
- Segment Tool
- Crescent Tool
- Cog Tool
- Cloud Tool
- Callout Rounded Rectangle Tool
- Callout Ellipse Tool
- Tear Tool
- Heart Tool
- Spiral Tool
- QR Code Tool

# 4. Print it

- **Various printing companies** (secret trick: get the outdoor/PP/vinyl ones)
  - OnlinePrinters (cheap, high quantity, do get “data check”)
  - WirMachenDruck (recommended a lot by German hackers)
  - Stickermule (only if using \$1 for 10 stickers discount)
- Printing it yourself
  - lower quality unless you know what you’re doing (I don’t)
  - better for test prints (low quantity)

# Goal of this lighting talk

Is there **any interest** in  
making cool **custom designs**?  
stickers, shirts, ... ?

**Workshop?**

**Thank you!**

**Questions?**
